

Anne M. Kogut, CIH, CSP, MS

Senior Industrial Hygienist

SANDLER OCCUPATIONAL MEDICINE
ASSOCIATES, INC.

OVERVIEW

Ms. Kogut joined SOMA in 2007 as a Senior Industrial Hygienist. She has been a Certified Industrial Hygienist since 1992 and a Certified Safety Professional since 1995. She has over 20 years of experience in the recognition, evaluation and control of workplace hazards in a variety of industries including defense, healthcare, metal manufacturing, food processing, and theme parks. She conducts industrial hygiene and toxicology projects, noise and silica exposure assessments, indoor air quality evaluations, lead and asbestos exposure and remediation projects, chemical risk assessments and recommended controls, worker right-to-know, hazardous waste evaluation and remediation projects, in-plant evaluations to identify, quantify and control health hazards; and provide expert witness services. Prior to joining SOMA, she managed projects and provided technical expertise in a broad range of industrial hygiene projects to include beryllium, hexavalent chromium, indoor air quality, microbial contamination investigations, noise surveys, personal protective equipment, health and safety plans, as well as environmental concerns for employee protection during remediation and renovation projects. As Health & Safety Manager of a large defense contractor, she developed and managed all aspects of the facility health, safety, and environmental programs and conducted training and evaluations in the areas of hazard communication, personal protection, emergency preparedness, respiratory protection, safe work practices, radiation protection, and industrial hygiene.

EDUCATION

- Bachelor of Science, Environmental Sciences, Michigan State University, 1982
- Master of Science, Environmental Toxicology, Michigan State University, 1986

NOTED ACHIEVEMENTS

Ms. Kogut has conducted more than a hundred indoor air quality investigations including the collection of bulk and air samples during an indoor air quality study and remediation in a major 200-bed nursing home facility. She has conducted sampling during clean up efforts in response to the water damage caused by three hurricanes in 2004 and the Central Florida tornadoes in 2007. Ms. Kogut has conducted industrial hygiene and chemical exposure studies including the collection and evaluation of over 200 wipe and air samples for occupational exposure to beryllium. She conducted large multi-site exposure evaluation and noise modeling project for aggregate mining industry. Ms. Kogut has served as a Radiation Safety Officer for three separate client facilities in the State of Florida and Region I of the Nuclear Regulatory Commission (NRC). Ms. Kogut has assisted sites in obtaining ISO140001 and conducting audits.

CLIENTS

A few of the clients for whom Ms. Kogut has provided services to:

- General Dynamics Corporation
- Coalescent Technologies, Inc.
- Lancer Systems
- SeaWorld of Florida
- Boston Whaler
- University of Central Florida
- GBC
- Children's Memorial Hospital
- Martin Marietta Materials, Inc.
- Lockheed Martin Corporation
- Greene Tweed
- Embry Riddle University
- Universal Studios
- Mitsubishi Power Systems
- Cambridge Homes
- Frito Lay
- Veteran's Administration – Healthcare Facilities
