

Full-time/Part-time Industrial Hygienist

About the Company

Founded in 1983, Sandler Occupational Medicine Associates, Inc. (SOMA) is a leading occupational health and industrial hygiene consulting firm located in Reston, VA. We provide our clients with solutions to their occupational medical and environmental health and safety concerns by effectively combining our experienced and nationally recognized staff, advanced information technology solutions and state-of-the-art equipment and facilities with established evidence-based practices. Our business is expanding and we require additional industrial hygiene support. SOMA offers a competitive salary, extensive benefits (for full-time employees) and a flexible and casual work environment.

Education/Experience:

SOMA is seeking candidates for the following positions:

- Full-time industrial hygienist, with 1 to 5 years of field experience and a B.S. or M.S. in IH, Engineering or other related discipline. The candidate should be legally authorized to work in the US. This position will be full-time, contingent upon a client contract. The position is initially expected to last 1 year, but could be extended.
- Part-time industrial hygienist position with significant project hours with a possibility of developing into a full-time position. Requires a candidate with 3 to 10 years of field experience in industrial hygiene (IH). The candidate should be legally authorized to work in the US.

Skills Required for Both Positions:

- ❖ Motivated, dependable and hard-working individual
- ❖ Team player as well as able to learn on-the-job and apply the principles independently
- ❖ Good communication skills
- ❖ Ability to manage time and fluctuating workloads efficiently
- ❖ Familiarity with Google environment

Areas of Responsibility - Full-Time Position:

Responsibilities will include evaluating chemical and physical hazards in occupational environments. We envision the candidate spending time working on multiple on-site sampling surveys including projects at aggregate industry, utility plants, manufacturing sites and other industrial facilities. Our ideal candidate will be required to travel to sites throughout the U.S. about once or twice per month for a duration of 3 to 5 days. Other work will include indoor air quality projects, toxicology research, preparing technical reports, calibrating and maintaining sampling equipment and assisting IH experts prepare for legal cases. Up to 25 to 40% travel is required.

Areas of Responsibility - Part-Time Position:

Responsibilities will include evaluating chemical and physical hazards in occupational environments. We envision the candidate spending time working on multiple on-site sampling surveys predominantly at aggregate industry sites. Our ideal candidate will be required to travel to sites throughout the U.S. about once or twice per month for a duration of 3 to 5 days.
